Author(s)	Cumhur Güner, Phillip Schackier
Date	June 2, 2016

Project Successes

Name	Description
Found suitable online translation API	After some research that only let us to discover that many online translation APIs are not free of charge we stumbled upon yandex.com's free translation API (sign up required).
Successful implementation	After taking a little while to get used to the Qt framework implementation went relatively smoothly.

Lessons Learned

Description	Recommendation
Learned how to work with Qt. Gained understanding of Qt's signal and slot mechanism and practiced emitting HTTP requests to a remote web server using the service's public API.	To facilitate development, consider training staff in effective usage of the technology that is to be employed.
